

GURUPRASAD G

Junior Web Developer | Front-End Developer

+91 8951657957 | guruprasas27@gmail.com | Ballari, Karnataka, India

PROFESSIONAL SUMMARY

Detail-oriented Junior Software Engineer with hands-on experience in front-end development, component-based architecture, and full-stack web applications. Proficient in JavaScript (ES6+), React.js, Node.js, and modern web technologies with professional experience building responsive, maintainable UI components on enterprise-grade CMS platforms. Proven ability to debug and resolve production issues within defined SLAs, collaborate across cross-functional teams, and take ownership of deliverables. Passionate about writing clean, scalable code and continuously improving engineering practices.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python

Front-End Technologies: HTML5, CSS3, React.js, Responsive Web Design, Framer Motion, Cross-Browser Compatibility

Back-End Technologies: Node.js, Express.js, REST APIs, JWT Authentication, Socket IO

Databases: MongoDB

CMS & Content Platforms: Adobe Experience Manager (AEM OD & IC Platforms)

State Management: Context API, Atoms, Zustand

Version Control: Git, GitHub

Tools & Methodologies: Agile, Code Reviews, Debugging, Cross-Browser Testing, Component-Based Architecture

PROFESSIONAL EXPERIENCE

Junior Software Engineer | Indegene Limited | Sep 2025 – Present

- Develop and maintain front-end components using HTML5, CSS3, and JavaScript (ES6+) on Adobe Experience Manager (AEM), ensuring cross-browser compatibility and responsive design across OD and IC platforms.
- Engineer reusable, modular UI components following component-based architecture principles, reducing development time for new features and improving code maintainability.
- Diagnose and resolve production defects and live-site issues within defined SLAs, maintaining high application uptime and end-user satisfaction.
- Collaborate with developers, QA engineers, business analysts, and stakeholders throughout the software development lifecycle to deliver features on schedule in an Agile/Scrum environment.
- Participate in code reviews to enforce coding standards, identify bugs, and promote web development best practices across the team.
- Lead the development pod in the absence of the team lead — coordinating task assignments, tracking sprint progress, and ensuring on-time delivery of commitments.
- Recognized by senior management as backup POD Lead for strong ownership, performance, and consistent resolution of production issues.

Customer Care Executive → SME | Digitide Solutions Limited | Jun 2024 – Sep 2025

- Resolved 50+ customer queries per day while maintaining a 95% satisfaction rate, demonstrating strong communication and analytical problem-solving skills.
- Promoted to Subject Matter Expert (SME); mentored 4 training batches achieving a 100% first-attempt certification pass rate.

PROJECTS

Second Brain – Progressive Web App — *React.js, Node.js, Express.js, MongoDB, TypeScript*

- Architected and developed a full-stack Progressive Web App enabling users to save, organize, and semantically search content using HuggingFace NLP models.
- Designed scalable RESTful APIs with MongoDB, incorporating tag-based categorization for efficient content discovery and retrieval.
- Applied TypeScript for type-safe front-end and back-end development, reducing runtime errors and improving code reliability.

Expense Tracker – Personal Finance App — *React.js, Node.js, Express.js, MongoDB*

- Developed a responsive expense tracking web application with real-time budget calculations and interactive data visualizations.
- Integrated full CRUD operations with persistent MongoDB data storage for seamless financial record management.
- Designed mobile-first responsive layouts using HTML5 and CSS3, ensuring accessibility across devices.

CareBot – AI-Powered Health Assistant — *Python, NLP, Generative AI*

- Developed an AI-powered chatbot for medical students using Python and Generative AI, delivering context-aware responses through a user-friendly interface.
- Integrated Natural Language Processing (NLP) models for real-time subject-specific query handling and study resource recommendations.

INTERNSHIPS

AI-Powered Health Assistant Intern | Aptpath | Nov 2024

- Built CareBot, an AI-powered health assistant for medical workers using Python and Generative AI for intelligent medical query processing and support.

EDUCATION

Bachelor of Computer Applications (BCA)

Shree Medha Degree College | 2022 – 2025

KEY STRENGTHS

Adaptable & Quick Learner • Strong Team Collaboration • Ownership & Accountability

- Problem-Solving Mindset

LANGUAGES

English | Kannada | Telugu
